## ABOUT US

**Lian Wang Trading Pte Ltd** has become a prominent provider in the construction industry. Established since 1992, Lian Wang now offers a wide range of AAC/ALC Panels & Blocks, bricks, concrete pavers, bricks tiles and other constructions materials to the local companies. With more than 25 years of experiences and knowledge, Lian Wang Trading Pte Ltd has established itself as a reliable, respectable and responsible one stop service provider for our clients.

As the world move towards an environmental friendly and eco-green industry, we set up a subsidiary company "Greatwall Panel Pte Ltd", to produce Autoclaved Lightweight Concrete Panels for upcoming projects. Greatwall Panel is a solid lightweight concrete wall system that is designed for fast installation with minimal wastage with 4-hour fire rating, resulting in significant cost savings.

In additional, to cater the increasing demand of concrete interlocking and clay paver, we have also set up a subsidiary company "Jia Wang Paving Supplies Pte Ltd" for our client's convenience. Always in the forefront to bring quality pavers to our local shores. With a fleet of twenty-six Lorries with crane, we ensure prompt delivery and best service in an efficient way to our clients. Throughout the years, Lian Wang has developed from a humble to a reputable providing high standard quality of products and excellent services to its clients.

## MISSION, VISION & CORE VALUES

### Mission

Our Mission is to actively search for Green Building Products, understanding market Demand and provide excellent services to our customers.

### Vision

Our Vision is to become Singapore Leading Suppliers for Building Materials, working hand in hand with our customer to acquire and promote green products so as to achieve mutual growth and profitability.

### Core Values

- Customer Oriented
- Trust & Reliability
- Ability to take ownership
- Quality Assurance
- Unity
- Resilient & Hardworking

# AUTOCLAVED LIGHTWEIGHT CONCRETE PANEL (ALC)

## FEATURES:

### Light Weight

At 650/m<sup>3</sup> LeichtBric Panel is one third or half-light than the equivalent fired clay brick. This unique characteristic leads to save the materials required for frame and foundation of the building as well ease the construction and delivery process.

### Acoustic Insulation

LeichtBric Panel has natural sound insulation thanks to its porous structure and ability to dampen mechanical vibration energy. The sound coming from inside or outside of the room moves in Zig Zag direction, in which it will split up and minimized substantially before going through the all.

### Thermal Insulation and Energy Efficiency

LeichtBric Panel is very low thermal conductivity. Building space tends to be cooler in summer and warmer in winter hence saving of energy consumption of up to 40% can be achieved from air conditioning.

# AUTOCLAVED LIGHTWEIGHT CONCRETE PANEL (ALC)

### Fire Resistant

LeichtBric Panel is able to hold structural integrity under the heat of 1200 degrees Celsius in the event of a normal fire. Furthermore it is capable of being fire resistant for within 4 hours.

### Durability

LeichtBric Panel is highly uniform in which the concrete structure is cured in high pressured saturated steam. The manufacturing outcome produces solid structure including tobermorite. This helps it achieve high compressive strength of at least 4.0Mpa among other light weight construction materials.

### Environmentally Friendly

LeichtBric Panel is an ecologically friendly building product, starting from raw materials to the production process. It cuts down toxic waste and emissions which are harmful to the environment that can cause greenhouse effect.

## TESTED • CERTIFIED • TRUSTED Singapore

### Green Lable Singapore

BB wall Panels has been awarded the prestigious Green Label by the Singapore Environmental Council for its environmental friendly properties. The Green Label is an internationally recognised certification in more than 22 countries worldwide including Germany, United States of America and Japan.

### ISO 14001

Building Blocs has also achieved the international ISO 14001 certification by implementing a robust Environmental Management system [EMS] that achieves excellent waste management and recycling in our manufacturing process. This results in minimising negative impacts to our environment and building a sustainable environment.

### TUV

TUV is an internationally recognised testing institution headquartered in Germany. TUV Singapore is the certification body for BB Wall Panels for tests involving hoxicity (BS 6853) and thermal conductivity (ASTM C1363). Both test results show that BB Wall Panels do not emit harmful levels of toxic gases and provides excellent thermal properties.

### ISO 9001

Building Blocs achieved the international ISO 9001 certification in our commitment to high product quality standards and standardization of manufacturing processes. This ensures that our customers can consistently rely on us to be a trusted and reliable supplier to their building needs.

### SETSCO

BB Wall Panels has been extensively tested for strength and robustness under the BS 523e4 standard as well as compressive strength and water absorption tests. SETSCO Singapore an internationally recognised testing institution is the certification body for BB Wall Panels. The multitude of tests carried out proves the outstanding strength and durability properties of the BB Wall Panel.
